

BULLY DOG
MAKING EVERY RIDE A BULLY!

GT Gas & Diesel

All in one: tuner, safety monitor, Driving Coach and performance gauges.

The Triple Dog® Gauge Tuner is an engine tuner and vehicle monitoring device with a 2.4" screen.

Through Bully Dog's advanced engine tuning techniques, the GT will add more horsepower and torque to many late model diesel & gas applications.

The GT also gives you horsepower that is adjustable on-the-fly, allowing you to change power output for towing or changing driving conditions at the press of a button. Fuel economy also improves as a result of better engine tuning. Substantial improvements in fuel economy can be realized with the improved tuning coupled with a conservative driving style.

The GT is designed to remain plugged into the vehicle's OBDII port during vehicle operation so it can monitor and display critical vehicle information such as exhaust gas temperature and transmission temperature. The GT can also modify certain vehicle characteristics such as speed limiters, transmission tuning and many others. For detailed vehicle specific information check our website, there you can see exactly what the GT does for each vehicle specific application.

Pyro Probe Kit (40390) sold separately

2012 Diesel & Ford EcoBoost Now Available

GT DIESEL

DESCRIPTION	PART #
GT for Dodge Ram 5.9L, 6.7L Cummins '03-'12	40420

GT for Nissan / Infiniti	40410

WATCHDOG™

Optimizing the performance of your vehicle starts with understanding what it is doing and how it is performing.

As you modify your vehicle in any way it is important to know and understand what those modifications are doing to your vehicles performance, it is also important to understand these things when altering your chassis set-up and/or your driving style. Keeping an eye on vehicle parameters such as temperatures and speeds is also very important to any performance vehicle owner.

The WatchDog is also a very useful general purpose gauge unit for towing and everyday driving. It will support our aftermarket pyrometer kit to monitor EGTs and will provide automated safety warnings based on a number of different vehicle parameters.

For the fuel economy minded motorist, the WatchDog has the Driving Coach which will help just about anyone achieve better fuel economy.

DESCRIPTION	PART #
WatchDog™ Monitor (White)	40400
WatchDog™ Monitor (Black)	40402

Works on most vehicles 1996 & newer with OBDII

RAM® HEAVY DUTY MOUNTING KITS

Upgrade your GT or WatchDog mounting kit to a RAM® mounting kit.

We have partnered up with the leader in the custom mounting industry National Products Inc. better known as RAM to bring you some truly reliable and unique mounting option. Together Bully Dog and RAM have developed a custom T-Slot adaptor for the GTs and WatchDogs that ensures a solid fit and finish, and its available exclusively through Bully Dog Technologies. All parts included in these kits that are manufactured by National Products, Inc. and come with a lifetime warranty.

DESCRIPTION	PART #
RAM Heavy Duty Suction Cup Mount for GT & WatchDog	30600
RAM Heavy Duty Mirror-Mate Mount for GT & WatchDog GMC, Chevy & Cadillac	33600
RAM Heavy Duty Mirror-Mate Mount for GT & WatchDog Ford, Lincoln, Dodge, Chrysler, Jeep, Nissan & Toyota	31600

RAPID FLOW

Injection Molded Rapid Flow Cold Air Intakes

Our industry-best intakes use a highly durable and adaptable cross link polyethylene material that can meet nearly any space requirements, which insulates from engine heat, and seals to cold air sources better than a metal enclosure. We have also greatly improved the aesthetics of our air intake line by switching to the cross link material.

GT Gas: Part # 40410

ENGINE FAN

Run the engine fan in high speed mode at any coolant temp.

LOCKERS

Engage all lockers in 2wd, 4whi & 4wlow up to 30 mph

TPMS (TIRE PRESSURE MONITORING SYSTEM)

Change the stock preset value to a number from 10-60 PSI

IDLE UP

Enable and select a value for the Engine Idle position

SWAYBAR DISCONNECT

Disconnect in 4WD Low, 4WD Hi, and 2WD and up to 30 mph

TRACTION CONTROL

Instantly disable traction control

TUNING LEVELS:

- **Off Road:** This Tune behaves like the regular tune but has lowered throttle sensitivity giving the driver more control over the power they are putting to the ground. In addition to the throttle sensitivity, the engine fan will also turn on "high" when radiator temperatures reach 200°.
- **Regular/ Tow Tune:** Great for everyday driving and light towing, will add a little over 10 hp to the wheels at full throttle. As with the Off Road Tune, the engine fan will also turn on "high" when radiator temperatures reach 205°.
- **Premium:** 91 octane fuel or better 15 to 20hp. The engine fan will also turn on "high" when radiator temperatures reach 205°.

DOWNLOAD FEATURES: features only available by downloading

- **Speed Limiter:** Adjust from 45mph to 200mph.
- **Rev Limiter in Drive:** Adjust from 5000 rpm to 6200 rpm.
- **Rev Limiter in Neutral:** Adjust from 3000 rpm to 6200 rpm.
- **Calibrate Speedometer:** Adjust from a tire size of 23.2" up to 45.5"
