

THE SMARTEST BATTERY CHARGERS IN THE WORLD

**US 800 - 12 Volt**  
**Your Ideal Maintenance**  
**Charger**  
**(#56-213)**

The US 800 is above all an optimal maintenance charger for seasonal vehicles with batteries up to 100 Ah. It also easily charges motorcycles, lawn mowers and jet skis.

**MUS 4.3 - 12 Volt**  
**State of the Art Technology**  
**(#56-864)**

Charger can solve a broad range of battery-problems. Features battery diagnosis that shows if a battery can receive & retain a charge, special reconditioning function that restores stratified & deeply discharged batteries, maintenance charging, a mode for optimized charging during cold days & the charging of demanding AGM batteries. Automatic 8-step charger delivers selectable 0.8 A or 4.3 A to 12 V batteries from 1.2-110 Ah.

**-NEW-**

**Multi US 3300**  
**The Charger that all**  
**Households should have**  
**(#56-158-1)**

The Multi US 3300 is a versatile multi-tasker charger in a compact format which makes it convenient and easy to charge and maintain all household vehicles with 12V batteries.

A unique cold weather temperature mode enables fast charging even in the coldest of climates and also specifically recommended for Red Top Optima batteries. Car is typically back on the road in less than an hour.

**US 0.8 - 12 Volt**  
**Smallest 12-Volt Battery Charger**  
**(#56-865)**

Compact & fully automatic 6-step charger for 12 V batteries from 1.2-32 Ah and is suitable for maintenance charging up to 100 Ah. The US 0.8 is splash & dust proof, delivers 0.8 A & is designed to protect vehicle electronics. It is non-sparking, reverse polarity protected & shortcircuit proof.

**-NEW-**

**Multi US 7002**  
**The new Generation**  
**Universal Charger**  
**(#56-353)**

The Multi US 7002 is the charger that is ideal for the charging needs of your recreational vehicle, car and boat, just about any 12V vehicle. The charger is well suited for year round use. Thanks to the SUPPLY mode, when charging a battery you avoid losing expensive program settings. Using RECOND mode you can correct the acid stratification which often occurs in deeply discharged batteries. The Multi US 7002 is recommended for the Yellow Top Optima batteries.

**US 800 - 6 Volt**  
**Small Battery Charger**  
**(#56-191)**

The UC 800 is a the battery charger that gives your old car a new life. It is a complete 6V battery charger in a diminutive format that charges everything from small batteries of 1Ah up to the larger tractor batteries. Perfect for maintaining the often less used 6V vehicles.

THE SMARTEST BATTERY CHARGERS IN THE WORLD

### MULTI US 25000 (#56-674)

MULTI XS 25000 is the professional charger that gives complete battery care for large batteries in workshops, caravans, or boats. It is fully-automatic with unique 8-step charging that supplies 25 A and which is suitable for 12 V batteries between 40-500 Ah.

- Analyses whether battery can accept & retain the charge
- Removes harmful lead sulphate crystals
- Recond mode that balances the acid concentration in deep discharged batteries
- Supply mode allows the charger to be used as a power supply if you need to disconnect batteries
- Integrated temperature sensor that enables optimal charging at all temperatures between +50°C & -20°C
- Compatible with vehicle electronics, non-sparking & features reverse polarity & short circuit protection

### D250S Dual (#56-482)

The D250S DUAL charger obtains its energy from DC sources such as alternators, solar panels or wind power and optimises this power to meet the charging requirements of different battery banks. The D250S DUAL automatically selects the best connected DC energy source (of 2) for the purpose and switches between these energy sources to achieve high efficiency multi-stage charging. Particularly suitable for charging caravans, motor caravans, boats and second homes that do not have access to grid power supplies.

- Has a temperature sensor which ensures optimal charging voltages at all temperatures
- Ensures that your batteries are always in good condition, quick charging and long battery lifetimes
- Fully automatic 5-stage charger that supplies 20A to 12V batteries of 40-300Ah
- IP65 classified (water jet and dust protected and approved for outdoor use), protects vehicle electronics and is suitable for all types of lead-acid batteries (Wet, MF, Gel, AGM)

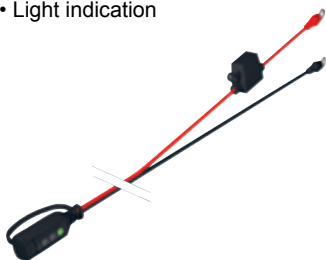

## ADD-ON COMFORT INDICATORS

Easy to use • Prevent Stratification • Prolong the Battery Life • Technical • Suited for the above Battery Chargers

### Comfort Indicator Eyelets Small Batteries (#56-382)

Perfect for motorcycle, lawn mower, jet ski, ect. It can be permanently mounted for easy viewing when battery needs charging.

- 8.4 mm eyelets
- 550 mm cable
- 15A fuse
- Light indication

### Comfort Indicator Clamps Car Dealers (#56-384)

Aimed at preventing dead batteries at the car dealerships and avoiding embarrassing situations when the car does not start when sold. Reduce the number of returned batteries by keeping track of the car battery's status.

- CTEK original clamps
- 1500 mm cable
- 15A Fuse
- Light indication

### Comfort Indicator Panels Large Vehicles and Boats (#56-380)

For professional users to view the status of a battery - when hard to get to. Comfort indicator - panel offers easy access for viewing the battery status, from a standard panel of a boat.

- 8.4 mm eyelets
- 1500 mm cable
- 154 fuse
- Light indication  
(Size: 35 mm x 21 mm x 50 mm)

### Comfort Indicator Pigtail Small Batteries (# 56-562)

Works with most small 12 volt batteries including the type found in lawnmowers & motorcycles. It will work in almost all temperature conditions & can be permanently mounted for an easy view.

- Enables you to always monitor the condition of your vehicle's battery
- Can be permanently mounted
