

IT'S THE VALUE PROPOSITION!

For over 40 years, Kargo Master has been giving you more. More function, more strength, more durability, and more style than any other manufacturer of truck and van equipment. When you purchase Kargo Master, you get the best products, the best warranty (lifetime), and the best price.

Superior Corrosion Protection

Every Kargo Master rack is Zinc Epoxy Primed beneath the gloss Marine Grade Polyester Powder Coat Finish. This system provides Over 5 Times The Corrosion Protection of a conventional un-primed powder coat. No other manufacturer goes to this expense to protect your rack and your vehicle.

OUR RACKS STAND UP TO CANADIAN WINTERS!!

The section of a Kargo Master rack assemble together quickly with swagged tube joints and a single bolt. The male end of one tube necked down so that it fits tightly inside the other. At each joint, the tube wall thickness is doubled. In 36 years of manufacturing truck racks, we have never had a joint failure.
