

POP & LOCK®

MANUAL TAILGATE LOCKS

The Pop & Lock manual tailgate lock is customized to be integrated into current OEM tailgates. Requiring less than 15 minutes of installation, the lock simply bolts on to the handle and locks into place to secure the tailgate's contents when used in conjunction with a cap or tonneau cover. Made of hardened steel, the tailgate lock is finished with a UV resistant coating giving it a stock appearance.

POWER TAILGATE LOCKS

The Pop & Lock power tailgate lock unlocks the tailgate using the OEM key

fob. The power tailgate lock dead bolts the tailgate preventing the contents from being lost or stolen. The lock permanently mounts inside the tailgate with less than one hour of installation. It ties into the existing power door lock or remote entry system without drilling, splicing wires, or changing the current truck locks. A switch kit is also available for pickups without power door locks.
