

PowerCore® Introducing the only Zero Maintenance, 100,000 Mile Filter for your aftermarket intake system.

COMPATIBLE with COMPETITIVE intake systems

with PowerCore® your ride's aftermarket intake system will never come up short again.

FILTER MEDIA is formed INTO FLUTES. These flutes are layered to provide a TIGHT, RUGGED STRUCTURE to the filter.

3 CLEAN AIR travels out to YOUR ENGINE

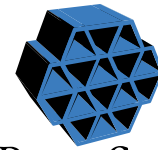

2 Fluted air channels are ALTERNATELY SEALED allowing air to ENTER through an OPEN FLUTE and forcing it to EXIT OUT an ADJACENT FLUTE.

1 DIRTY AIR travels in and is FILTERED IN ONE PASS through the media.

Volant PowerCore® Media Filters

Part#	Flange ID	Height	Dia	Angle	Type	Color

PowerCore®
A DONALDSON FILTRATION TECHNOLOGY

Ultra-Web® Nanofiber Filtration by Donaldson

- Invented by Donaldson in the 1980's.
- Engineered to perform in extreme temperature and humidity conditions, unlike ordinary nanofibers.
- Unique, advanced nanofibers collect contaminant on the media surface.
- High efficiency, longer filter life.
- High capacity - holds more contaminant.
- Identifiable by the blue media color.
- Over 1 billion square feet sold.

Volant PowerCore® air filters boost engine power with increased air flow over five layer cotton fibers. This delivers three times more efficiency than conventional pleated filters. Plus, they're completely maintenance free for 100,000 miles with no cleaning or oiling. So hook one up on your aftermarket intake system. You'll be in for the long ride. The only 100,000-mile air filter for your aftermarket intake system. New Volant CAI® Kit with PowerCore® Technology.

Volant Filter Box: Cross-link polyethylene filter box is engineered to specific design. It insulates and protects the filter from pulling hot air from the engine compartment, thus, increasing horsepower.

Volant Air Duct: Cross-link polyethylene air ducts are sculptured to give the engine a less restrictive air pass to breathe. Larger diameters, unique bends and smooth transitions give you maximum horsepower and awesome throttle response.

Volant Filters: Pro 5 Filters, Primo Filters and the New PowerCore 100,000 mile Filters.

Polished Aluminum Lid: Polished Aluminum Lid is our newest upgrade. Embosses polished aluminum lid with high grade neoprene foam backing.

High Performance Silicon Connectors: High performance silicone hose connectors provides flexibility while maintains strength and thermal stability.

Stainless Steel Clamps: Marine grade clamps allows optimal performance for virtually any application which requires maintainability and versatility.

Volant Cool Air Intakes brings you the new F5 lineup featuring part number 59867 for the new F250 6.7L. This system is designed with a high volume air duct and heat shield as one piece, making this 5 minute install the easiest 15hp on the market. The 59867 accepts the factory MAF sensor so no special tune is required, just attach the unit to the throttle body and place the shield on top of the lower half of the factory air box and tighten the clamps. That's easy horsepower!
