**Lift and Leveling Systems that
Ride Smooth, and are
Engineered to Last!**

Revtek leveling systems for coil-over suspension incorporate the unique Split/Spacer design, which maintains the factory suspension geometry and won't cause premature wear to CV joints like other "cheapo" systems can. Ride quality doesn't suffer, and handling improves!

Ford

6004

Year	Application	Lift	Part #

**Bolt in Suspension Systems
that are
Completely Reversible!**

You heard right—most Revtek Suspension systems **bolt in with no cutting or welding required.** So unlike other lift kits that require a permanent commitment, Revtek systems can be removed if the customer requests it. That saves you money and headaches!
