REAR LIGHTING SYSTEMS

## Rear Lighting Systems

### Light Up Your Night with White Night

- **FITS VIRTUALLY ANY VEHICLE** with a hitch or step bumper
- Unique rear lighting system - Patented & Trademarked Technology
- Plug N' Go Wiring Adapter for 7-pin trailer outlets **ELIMINATES** wire splicing!
- Two powerful 55 watt high output halogen lamps
- Activates automatically when vehicle is in reverse
- Produces 130,000 candlepower of light
- Toggle switch on unit allows manual operation
- Mounts on receiver of most class 1 thru 4 trailer hitches
- Fixed mount model allows full use of hitch for towing
- Sturdy high impact case
- Easy to install and compact in size
- No drilling required

## Light Units

### Part No. 0004196 - Step Bumper Mount Light Unit

Light unit mounts to the bottom of a step bumper. It is used on vehicles without a receiver type hitch. May use a trailer ball for attachment or may be bolted. This light unit is also used with some of our installation kits

### Part No. 0004197 - 1-1/4" Insert Mount Light Unit

### Part No. 0004198 - 2" Insert Mount Light Unit

Light unit has an adjustable 2" stainless steel tube insert that slides into the hitch receiver and is secured with a typical hitch pin. Has a 3-wire disconnect plug to allow removal for towing.

### Part No. 0004199 - Fixed Mount Light Unit

Fits typical 2" receiver hitches. Light unit is open thru the center and allows use of a hitch insert for towing. Unit requires 3/4" of clearance between top of hitch tube and bottom of the bumper. Note: Some factory hitches may require a wiring plug relocation plate.

# White Night

REAR LIGHTING SYSTEMS

**Introducing a breakthrough in safer driving and trailer towing for vehicles of all types**

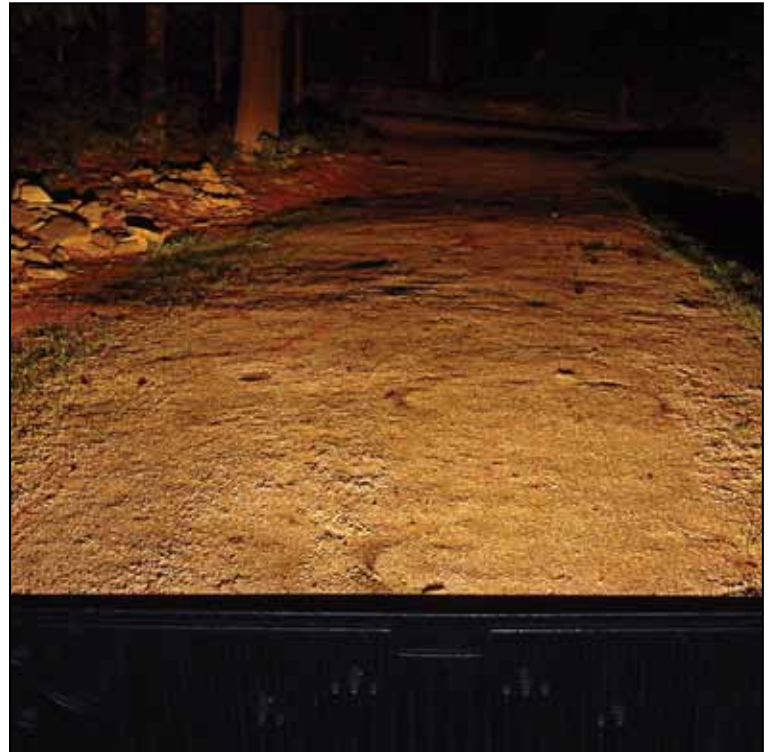

## **Part No. 0004149 PLUG N GO 7-Pin Wiring Plug Adapter**

This adapter inserts into the vehicle's 7-pin trailer wiring plug and the 3-wire pigtail plugs up to the White Night light unit for a simple installation without any wire splicing. Flip up lid socket allows full 7-pin trailer hookup.

## **Fixed Mount Light Unit Trailer Wiring Plug Relocation Kits**

When installing our Fixed Mount Light Unit on some factory hitches, the light unit will cover or partially cover the factory trailer wiring plugs. These kits move the trailer wiring plugs further over to the left where they are accessible.

Application	Part No.
99-07 GM PU, 00-01 Tahoe, Yukon, Suburban, Yukon XL	0004150
96-01 Dodge Ram 1500-3500, 02 2500-3500	0004151
02-06 GM Tahoe, Yukon, Suburban, Yukon XL, Avalanche, Escalade	0004154
04-07 Ford F-150 Pickups	0004158
